PROFESSIONAL SUMMARY

Fresh graduate in Information Systems - Intelligent Systems Engineering with hands-on experience in AI development, including Retrieval-Augmented Generation (RAG), prompt engineering, and LLM-based cybersecurity compliance systems. Strong foundation in Python, machine learning, and computer vision, with proven ability to work in cross-functional technical teams.

EDUCATION

Bachelor of Intelligent Systems Engineering (Hons)
Universiti Teknologi MARA (UiTM)
Oct 2022 – February 2026

TECHNICAL EXPERIENCE

AI Developer (Intern)
Nexagate Sdn Bhd, Malaysia | September 2025 – December 2025

- Designed and tested Retrieval-Augmented Generation (RAG) and Agentic RAG pipelines using internal compliance playbooks.
- Prepared, structured, and vectorized documents for ingestion into the company's LLM server environment.
- Performed prompt engineering for cybersecurity and ISMS compliance gap analysis to improve recommendation accuracy, achieving more domain-tailored answers.
- Evaluated LLM deployment approaches using Hugging Face Inference API and local Ollama-based models.
- Tested and compared multiple LLMs (GPT-4.0, GPT-4.1, fdtn-sec-8B-instruct) for cybersecurity maturity assessments.
- Optimized LLM usage by evaluating a quantized ftdn-Sec-8B-Instruct (Q4_K_M) variant as an alternative to the full model, maintaining comparable output quality.
- Processed LLM outputs into structured JSON formats for database ingestion and reporting.
- Collaborated with senior AI developers and risk & compliance teams to validate AI outputs against manual consultant's checklist, helped improve the accuracy from 7% to approximately 30%.

ACADEMIC PROJECTS

Final Year Project – Real-Time Gesture, Emotion & Direction Recognition
Oct 2024 – Present

- Developed CNN-based facial emotion and gesture recognition models using the KDEF dataset.
- Integrated MediaPipe landmarks with real-time inference for browser-based avatar interaction.
- Tools: Python, TensorFlow/Keras, OpenCV, MediaPipe, JavaScript.

Internal Messaging System Prototype

- Independently developed a centralized messaging system with a database normalization for multi-branch admin-customer communication
- Implemented batch dry-run previews for safe CRUD operations before commit changes
- Built a flask dashboard to visualize message logs and manage data batches
- Presented to senior management and the project was well received but was not deployed due to cost constraints

Machine Learning Classifier – Kaggle Dataset

- Built a supervised classification model using **scikit**-learn and Python.
- Achieved ~75% accuracy and visualized performance using matplotlib.
- Experimented with multiple parameters to reach optimal output

Database Design & Implementation – Oracle APEX

- Designed and implemented a relational database with ERD, normalization, and CRUD operations.
- Enforced constraints to ensure data integrity.

TECHNICAL SKILLS

Programming: Python, C++, Java, SQL

AI / ML: Machine Learning, CNNs, Computer Vision, RAG, Agentic AI, Prompt Engineering, CAG

Frameworks & Tools: TensorFlow, Keras, OpenCV, MediaPipe, scikit-learn, Ollama, Tesseract

Data & Visualization: Pandas, Matplotlib, Power BI, Microsoft Excel, Flask

Other: Problem-Solving, Technical Documentation, Cross-Team Collaboration

---

PROFESSIONAL EXPERIENCE

Chess Coach (Part-Time)
CHESSHACKS, Shah Alam | Mar 2023 – Present

- Conduct weekly beginner training sessions and explain analytical concepts clearly.
- Developed strong mentoring, communication, and analytical skills.

Event Management Team Member (Seasonal)
Malaysian Chess Festival, Kuala Lumpur | Aug 2023 – Present

- Coordinated logistics and scheduling for an international event with 1,000+ participants.
- Managed registrations and real-time issue tracking using Excel.

Administrative Assistant (Part-Time)

Al Kauthar Eduqids HQ, Shah Alam| January 2026 – Present

- Handled filing, organization and management of confidential documents
- Assisted with inventory tracking and manual record-keeping using excel sheets
- Supported day-to-day office operations

CERTIFICATION

- Database Programming Using SQL – Oracle Academy (2024)
- Database Design – Oracle Academy (2024)
